Product Spotlight

As we continue to look at going green, this issue will look at, what could be a smart new invention.

This product is a retrofit for your toilet that combines it with a sink, delivering a clean, environmentally friendly, and touch-free hand wash with every flush.

According to the manufacturer, the positives of this product are that it:

🌿 **CONSERVES WATER** – Fresh water for your hands, grey water for the bowl.

🌿 **SAVES MONEY** – Puts money in your pocket by detecting costly leaks and reducing water bills.

🌿 **MANAGES SMALL SPACES** – Get more elbow room with the ultimate small space solution.

🌿 **PROMOTES SANITATION** – Touch free wash eliminates interaction with germs on faucet knobs and handles.

🌿 **ENGAGES ALL AGES** – Convenient and immediate visual cue inspires hand washing of even the smallest hands.

Did you know the following waste water facts:

Leaks can account on average, 10,000 gallons of water wasted in the home every year, which is enough to fill a backyard swimming pool.

The amount of water leaked from U.S. homes could exceed more than 1 trillion gallons per year. That's equivalent to the annual water use of Los Angeles, Chicago, and Miami combined!

Ten percent of homes have leaks that waste 90 gallons or more per day.

Common types of leaks found in the home include leaking toilet flappers, dripping faucets, and other leaking valves. All are easily correctable.

This picture shows the functioning of the product and how easy the item is to install. It doesn't require anymore plumbing than installing a normal basic toilet.

Fixing easily corrected household water leaks can save homeowners more than 10 percent on their water bills.

OCI is not affiliated, in any way, with any manufacturer of this product and have not tested or used it. Our sole purpose is to educate our readers on a fairly new product we feel is interesting and may be worth looking into.

Famous Quote:

"When the well's dry, we know the worth of water."

Benjamin Franklin
